Tables in HTML

Table is a combination of rows and columns. We use tables in order to display data in an organized manner.

The following tags will be used to work with tables.

- <table>   - It is used to create /define a table
- <th>   - It is used to define a table Header. It is generally used to display the labels /titles of columns in table. Mostly it will be in the first row of table. It will display text bold format with center alignment.
- <tr>   - It is used to create a row in a table. How many rows we need that many <tr> tags we need to use.
- <td>   - It is used to create a cell in table. Td stands for table data. Between <td>   </td> we need specify the content to be displayed. The content can be text, bulleted list, numbered list , images etc.
- <caption> - It is used to give caption (heading) to the table.

e.g.

Sno	Name of Student	City
1	Ram	Hyderabad
2	Krish	Bangalore
3	John	Pune

e.g.

```
<table>
<caption>List of Students </caption>
	<tr>
		<th> SNo</th>
		<th> Name of Student</th>
		<th> City</th>
	</tr>
	<tr>
		<td> 1</td>
		<td> Ram</td>
		<td> Hyderabad</td>
	</tr>
<tr>
		<td> 2</td>
		<td> Krish</td>
		<td> Bangalore</td>
	</tr>
<tr>
		<td> 2</td>
```

```
            <td> John</td>

            <td> Pune</td>

        </tr>

</table>
```

Demo on Tables

List of Students

Sno	Name of Student	City
1	Ram	Hyderabad
2	Krish	Bangalore
3	John	Pune

    <head>
        <title>Table Demo1</title>
    </head>
    <body>
        <h1 align="center">Demo on Tables</h1>
        <hr color="red">
        <table border="1" align="center" bgcolor="cyan">
            <caption>List of Students</caption>
            <tr>
                <th>Sno</th>
                <th>Name of Student</th>
                <th>City</th>
            </tr>
```

```
        <tr>
            <td>1</td>
            <td>Ram</td>
            <td>Hyderabad</td>
        </tr>
        <tr>
            <td>2</td>
            <td>Krish</td>
            <td>Bangalore</td>
        </tr>
        <tr>
            <td>3</td>
            <td>John</td>
            <td>Pune</td>
        </tr>
    </table>
</body>
</html>
```

Displaying Images in Table
